PROFILE

I have the nature of a hard working man, diligent and I like to learn new things. I also easily get along with new people. To be a software engineering is not as easy as what people thinks I believe in my ability at my skills i can produce the best results of web that I can make. Working individual and teams is a great opportunities for me, time management and discipline is a point of my work.

To adopt with new culture in the company is a one of my specialty because i can do a very good communication to achieve a best goal in my life. Im willing to work under pressure and learn new things to improve my skills, my quality as well as the group the company that i work with.
